

Kinetic steel sculpture by Harry Bertoia, Spray circa 1970

Harry Bertoia

€1,100

REF: 7469

Height: 71 cm (28")

Diameter: 95 cm (37.4")

DESCRIPTION

Kinetic sculpture model Spray by Harry Bertoia made of steel wires arranged in a fountain-like spray, set on a cylindrical base in chromed steel.

Through the play of supple, light-catching rods, the piece conveys Bertoia's fascination with material vibration and the suggestion of movement. The whole reveals an organic yet graphic silhouette, emblematic of his sculptural research during the 1960s-1970s.

United States, circa 1970.
